

# Corporate Eyecare Scheme

## Information Request

### Why Join?

Well, as an employer, you have an obligation to staff healthcare.

Under current EEC directives, employers are liable to provide an eye examination for all VDU operators (irrespective of any current prescription) and to supply a pair of spectacles when required for VDU use only.

But more importantly, it's good for business.

Since almost all of us use computers pretty intensively these days, eyesight problems can become a real headache. Literally.

And if using a computer screen becomes a problem for your employees, how much less productive are they going to be?

Why us?

At Antony Austin we're committed to providing a professional, comprehensive optical service.

As a modern and independent practice, we can tailor a scheme specifically around your company's requirements.

We're reliable, helpful and friendly according to the people who matter: our customers

And last, but by no means least, we're convenient. Our practice is situated on Cowcross Street, just outside Farringdon Station.

### What's on offer?

As you'd expect, we'll conduct a complete eye examination using the most up-to-date equipment.

And we'll carry out all the relevant tests for VDU operators.

The specific benefits we offer you and your employees through our Corporate Eyecare Scheme are:

- A complete Eye Examination for £16 (usually £20)
- A copy of the prescription
- A VDU certificate of recommendation
- Spectacle frames with standard plastic lenses for £59.95 designed for use with VDUs
- Monthly invoicing, if required.

And of course, as a professional optometrists, we offer spectacle frames from designer to in-house brands, to suit every lifestyle .

There's also our full contact lens service, including both fitting and supply, and last, but not least, we have a huge range of sunglasses and accessories.

- Please call me to discuss my Corporate Eyecare requirements.
- Please send me more information.
